

The IT motion is with the groups, we have a new IT Chair, the special services/interpretation motion has a current update, the finance committee and our new treasurer has been working on the 5013 motion. The area has been busy with founders day events. I enjoyed the unity picnic which was very well attended, I heard the Bill W movie in north county was a rousing success, and I have been participating in policy, finance, IT, and young people. **Web servant candidates have been interviewed.** An update of the inventory of the area's capital equipment needs to be done, so I'm going to need everyone's help to locate and take stock of our assets. 2024 is a year we are supposed to hold an area inventory, so I thought it would be best to take care of that at September's big day assembly as part of our business. We have a full agenda tonight so let's get to it.
